

IP Phone Solution

VoX Communications 12249 Science Drive • Suite 135 • Orlando FL 32826 • (866) 869-9475 • www.voxcorp.net

Technology, Style, and Functional Convergence

Whether you are a small business or work out of your home, VoX can provide you with a state-of-art IP telephone with all of the key features that you will need. The Linksys SPA922 is equipped with 1-line and the SPA942 comes with 2-lines. Both phones have a 2-port Ethernet switch for input and output broadband ports. This stylish phone is simple to install with its menu and web-based configuration. The SIP-based architecture allows hundreds of configurable features and service parameters including remote provisioning and management.

Linksys Model SPA922/SPA942

Combined with VoX VoIP Service

When you combine VoX's VoIP service with the Linksys SPA922 or SPA942 IP phone, you will get the best of both worlds – superior voice service and a superior full-featured phone. We can make your life simple and hassle-free.

- VoX's nationwide network provides unparalleled cost advantages and performance you can depend on. The proprietary SIP-based architecture is uniquely designed to be ultra efficient with no single point of failure.
- Our easy to use back-office systems provide order flow management for efficient provisioning of billing and support services.
- VoX's user interfaces are easily customized to reflect your unique brand. Our solution was built to accommodate your needs.
- VoX pricing includes advanced features that typically cost extra. That's right, features such as voicemail, three-way calling, do not disturb, and caller ID are all standard.
- You are in full control of the packaging and pricing of your individualized solution.
